Annette,

I wanted to pass along information about the new Five Minute Fundamentals videos. They are working very well in our classrooms and add clarity to driving concepts.

The 2 second following distance is an example of clarification of these fundamentals. Other examples are watching for red light runners and improper passing. I'm not sure how this was produced as it is obvious these were actual roads and highways being used.

These videos have added an extra dimension to our students learning and have enhanced the learning experience.

Great job!

Thanks,

Ira Doty
